ABHIRAM HK

Full Stack .NET Developer | ASP.NET Core | React | Angular | SQL Server | Azure

Trivandrum, Kerala, India | +91 7356923377 | abhiramhk50@gmail.com | LinkedIn: linkedin.com/in/abhiramhk

---

PROFESSIONAL SUMMARY

Results-oriented Full Stack .NET Developer with 4+ years of experience building scalable web applications using ASP.NET Core, C#, React, Angular, SQL Server, and Azure. Experienced in developing secure REST APIs, responsive frontend applications, and enterprise solutions with strong expertise in performance optimization, authentication, and database tuning. Skilled in Agile development, debugging, and AI-assisted development tools.

TECHNICAL SKILLS

- **Backend:** ASP.NET Core, ASP.NET MVC, .NET Framework, C#, Web API, REST APIs,WPF,WinForm,VB.Net
- **Frontend:** React.js, Angular, HTML5, CSS3, Bootstrap, JavaScript, TypeScript, jQuery, Kendo UI
- **Database:** SQL Server, Oracle, MongoDB, MySQL, Elasticsearch, LINQ, Entity Framework Core, SSMS
- **Tools:** Git, GitHub, Azure DevOps, IIS, Postman, Visual Studio, VS Code, Antigravity
- **AI-Assisted Development:** GitHub Copilot, Claude (code generation, debugging, productivity enhancement**)**
- **Cloud & DevOps:** Azure Basics, CI/CD Pipelines, Deployment Management.
- **Software Practices:** Object-Oriented Programming (OOP), SOLID Principles, Design Patterns (Singleton, Factory, Prototype), Dependency Injection, CQRS Pattern
- **Other:** JWT Authentication, SignalR, Agile/Scrum, Performance Optimization, Code Reviews, Technical Documentation

PROFESSIONAL EXPERIENCE

Software Engineer – ThoughtLine Technologies Pvt. Ltd | Apr 2025 – Present

Project: Fleet Management & Telematics Platform

Tech Stack: ASP.NET Core 8, React.js, Angular, SQL Server, Azure

- Developed RESTful APIs for real-time fleet tracking, trip management, and telemetry data processing.
- Built responsive dashboard modules using React.js and Angular for vehicle monitoring and operational reporting.
- Optimized SQL Server queries and backend services to efficiently process large telematics datasets.
- Implemented JWT-based authentication and role-based authorization.
- Collaborated with cross-functional Agile teams using Git and Azure DevOps.

Achievements:

- Improved API response times by 60% through query optimization and backend performance tuning.
- Reduced database query execution time from 5 seconds to 1.5 seconds.
- Enhanced system scalability for high-volume vehicle telemetry data processing.

Software Engineer – Distinct Infotech Solutions | Dec 2023 – Apr 2025

Project: Anti-Money Laundering (AML) & Compliance Monitoring Platform

Tech Stack: ASP.NET MVC, ASP.NET Core Web API, Oracle, MongoDB, Elasticsearch

- Contributed to the development of an AML and compliance monitoring platform used by financial institutions for regulatory compliance and risk management.
- Developed customer and transaction screening modules to detect potential money laundering activities and compliance violations.
- Implemented blacklist/watchlist screening against sanction lists and regulatory databases.
- Built suspicious transaction monitoring workflows and automated case generation for compliance investigations.
- Optimized backend services and database operations using Oracle and MongoDB to handle high-volume transaction data.
- Integrated Elasticsearch to enable fast, scalable search and filtering across customer, transaction, and case management records.
- Collaborated with business analysts and compliance teams to implement regulatory requirements and enhance system functionality.

Achievements:

- Reduced AML screening processing time by 40% through query and workflow optimization.
- Enhanced application maintainability and scalability through modular architecture and reusable components.
- Increased search efficiency and user productivity by implementing Elasticsearch-based indexing and filtering.

Software Engineer – EBS Technologies Pvt. Ltd | Nov 2022 – Dec 2023

Project: ERP System with GST E-Invoicing & E-Way Bill Integration

Tech Stack: ASP.NET MVC 5, VB.NET, SQL Server, Web API, WinForms

- Contributed to the development and enhancement of an ERP platform used for finance, inventory, sales, and business operations management.
- Integrated GST-compliant E-Invoice and E-Way Bill functionalities to support automated tax and logistics processes.
- Built and maintained ASP.NET Web APIs to facilitate data exchange between ERP modules and external applications.
- Integrated ASP.NET Core applications with Android-based mobile solutions for real-time business data access.
- Optimized SQL Server database queries and stored procedures to improve application performance and reliability.
- Supported application deployment, troubleshooting, and production issue resolution.

Achievements:

- Automated E-Invoice and E-Way Bill generation, reducing manual effort and improving regulatory compliance.
- Reduced report generation time from 60 seconds to 30 seconds.
- Enhanced system performance and stability through database optimization and backend improvements.

- Streamlined integration between web and mobile applications, enabling better accessibility for end users.

Freelance Full Stack Developer (Part-Time) | Apr 2021 – Nov 2022

Projects: Restaurant Management System, Expense Analytics Platform, Real-Time Chat Applications, Custom Business Solutions

Tech Stack: ASP.NET Core, React.js, Angular, SignalR, Firebase

- Designed and developed 10+ custom web applications for clients across various business domains.
- Built secure RESTful APIs using ASP.NET Core and developed responsive user interfaces with React.js and Angular.
- Developed a Restaurant Management System featuring order management, billing, inventory tracking, and reporting functionalities.
- Created an Expense Analytics Platform for tracking expenses, generating insights, and visualizing financial data.
- Implemented real-time messaging and notification features using SignalR and JWT-based authentication.
- Integrated Firebase services for authentication, notifications, and cloud data management.
- Managed end-to-end project delivery, including requirements gathering, development, deployment, and client support.
- Deployed and maintained applications using IIS, GitHub, and cloud-hosted environments.

Achievements:

- Successfully delivered 10+ client projects with end-to-end ownership from design to deployment.
- Improved application security and scalability through secure authentication and optimized backend architecture.
- Reduced development time by implementing reusable components and modular design practices.
- Built long-term client relationships through timely delivery and ongoing technical support.

AWARDS & RECOGNITION

- Best Performer Award – ThoughtLine Technologies Pvt. Ltd. (2026) - Recognized for outstanding performance, timely project delivery, and contributions to the Fleet Management & Telematics Platform.
- Best Performer Award – EBS Technologies Pvt. Ltd. (2023) - Awarded for exceptional contribution to ERP development, GST E-Invoice & E-Way Bill integration, and consistent delivery of high-quality solutions.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science – University Institute of Technology (UIT), Thiruvananthapuram — Graduated in 2022

SOFT SKILLS

Problem Solving, Team Collaboration, Analytical Thinking, Communication Skills, Quick Learning
